About Eklabya

EklabyaE-LearningPvt Ltd is a leading global edtech platform offering industry-aligned certification programs designed to elevate your professional journey. With a strong foothold in skill-based education, Eklabya delivers cutting-edge training across fields like IT, management, finance, healthcare, and more—catering to the evolving demands of the modern job market.

Our AI Powered Data Analytics Training Program is designed to help learners master the integration of artificial intelligence techniques with traditional data analytics. This course focuses on transforming raw data into actionable insights using advanced tools, machine learning models, and intelligent automation systems.

Our Goals

Value generation is our main goal!

“We aim to empower individuals and organizations globally by delivering impactful learning experiences driven by expert content, innovative tools, and advanced technology.”

Why Data Science Certification Training Course?

01. Why is AI important in data analytics?

AI enhances data analytics by enabling predictive modeling, automation, and deeper insights that go beyond traditional analysis methods.

02. How does this course help in real-world scenarios?

It prepares learners to handle real datasets, build models, and derive insights that support business decisions.

03. What makes this course industry-relevant?

The curriculum is aligned with current industry needs, combining analytics with AI technologies.

04. Is this course suitable for beginners?

Yes, it starts with fundamentals and progresses to advanced AI applications.

05. How does this improve career opportunities?

AI-powered analytics professionals are highly valued across industries for data-driven decision-making.

What's the Curriculum?

1. Data Analytics Foundations with AI

- Data Analytics Lifecycle
- Python with NumPy & Pandas
- Prompt Engineering Basics
- AI-assisted Coding with ChatGPT/Copilot
- Exploratory Data Analysis (EDA)
- Sales Data Analysis Project

2. Advanced SQL & AI Querying

- MySQL & Database Design
- Joins, Subqueries & CTEs
- Natural Language to SQL
- ETL Pipelines
- Database Optimization
- SQL with Python Integration

3. Statistical Inference & Predictive Analytics

- Probability & Hypothesis Testing
- Linear & Logistic Regression
- Time Series Forecasting
- A/B Testing Fundamentals
- Predictive Modeling Basics
- AI-assisted Statistical Analysis

4. AI-Driven Data Visualization

- Data Storytelling Principles
- Power BI & Tableau Workflows
- Python Visualizations
- AI-generated Insights & Narratives
- Natural Language Dashboard Queries
- Executive Dashboard Design

5. Machine Learning for Analysts

- AutoML Fundamentals
- Classification & Clustering
- Feature Engineering with AI
- Hyperparameter Tuning
- Anomaly Detection
- Customer Churn Prediction Project

6. Generative AI for Data Insights

- LangChain for Analytics
- RAG for Private Data
- Sentiment Analysis
- Automated Report Generation
- Text-to-Insights Systems
- AI Ethics & Privacy

7. Advanced Analytics & Big Data

- BigQuery & Snowflake Basics
- Real-time Analytics
- PySpark Fundamentals
- AI in Cloud Pipelines
- Cloud Cost Optimization
- API-based Data Ingestion

8. Capstone Project & Portfolio

- AI-powered BI System Project
- AI Workflow Documentation
- Resume & LinkedIn Optimization
- Mock Technical Interviews
- GitHub & Kaggle Portfolio
- AI Career & Salary Guidance

Career Scope

Median Salary of Data & Analytics professionals over the years

Career Development

DATA SCIENTIST

Business Intelligence Expert -
Market Analyst -

DATA ANALYST

- Analytics Professional
- Business Analyst

DATA ENGINEER

Data Architect -
Quantitative Analyst -

BUSINESS INTELLIGENCE DEVELOPER

- System Analyst
- Machine Learning

Whom Is It For?

1. Computer Science and IT Graduates
2. Aspiring Data Scientists and Analysts
3. Engineering Graduates
4. Business professionals aiming to use data insights,

Program Outcomes

- Develop strong skills in data analysis and visualization
- Learn to apply AI techniques for predictive analytics
- Gain experience with real-world datasets and projects
- Build models to extract insights and support decision-making
- Understand business applications of data analytics
- Become job-ready for analytics and AI roles

Qualifications for Eligibility

Preferably CS/IT degree; programming or ERP experience accepted.

Media Recognition

Internship in Top MNCs

Internship in
Top Global Companies

Get work experience with virtual programs from top global companies such as:

Certificate of experience from top global companies

At your own speed and in your own time, acquire extremely elevating skills.

Make connections between students and prestigious companies by simulating their work.

Obtain a genuine professional edge by working with Fortune 500 companies.

Learn essential skills and get a taste of what actual job looks like. Most notably, some of the world's top pupils
