About Eklabya

EklabyaE-LearningPvt Ltd is a leading global edtech platform offering industry-aligned certification programs designed to elevate your professional journey. With a strong foothold in skill-based education, Eklabya delivers cutting-edge training across fields like IT, management, finance, healthcare, and more—catering to the evolving demands of the modern job market.

Our Microsoft Fabric Training Program is a comprehensive, hands-on course designed to help learners master Microsoft’s next-generation unified data analytics platform. Microsoft Fabric integrates multiple powerful tools—including Azure Data Factory, Synapse Analytics, Power BI, and Data Activator—into a single, seamless ecosystem that simplifies how organizations manage and analyze data.

Our Goals

Value generation is our main goal!

“We aim to empower individuals and organizations globally by delivering impactful learning experiences driven by expert content, innovative tools, and advanced technology.”

Why Data Science Certification Training Course?

01. Why is Microsoft Fabric important today?

Microsoft Fabric unifies data engineering, analytics, and business intelligence into a single platform, reducing complexity and improving efficiency.

02. How does Fabric help in real-world analytics?

It ensures high availability, disaster recovery, performance optimization, and seamless user experiences across applications.

03. What makes this course industry-relevant?

It covers cutting-edge tools like Power BI, Synapse, and OneLake, which are widely used in enterprise environments.

04. Is Microsoft Fabric suitable for beginners?

Yes, the course starts with foundational concepts and progresses to advanced analytics and AI workflows.

05. How does this improve career opportunities?

Professionals skilled in unified analytics platforms are highly in demand across data-driven industries.

What's the Curriculum?

1. Introduction to Microsoft Fabric & OneLake

- Microsoft Fabric Fundamentals
- OneLake Architecture
- Workspaces & Governance
- Medallion Architecture
- Fabric Shortcuts
- Security & Sensitivity Labels

2. Data Engineering: Lakehouses & Warehouses

- Fabric Lakehouse Design
- SQL Endpoint vs Warehouse
- Delta Parquet Optimization
- Data Warehouse Management
- T-SQL for Fabric
- Schema Management & Versioning

3. Data Integration with Data Factory

- Dataflows Gen2
- High-Scale Data Pipelines
- External Data Integration
- Incremental Loading & CDC
- Error Handling & Monitoring
- Pipeline vs Notebook Orchestration

4. Big Data Processing with Synapse Spark

- Fabric Spark Notebooks
- PySpark & Spark SQL
- Spark Performance Optimization
- V-Order & Z-Order
- MLflow Integration Basics
- Reusable Notebook Logic

5. Real-Time Intelligence & KQL

- KQL Database Basics
- Real-Time Hub & Eventstreams
- Writing KQL Queries
- Real-Time Dashboards
- Reflex Automation
- IoT & Streaming Data

6. Business Intelligence & Direct Lake

- Direct Lake Mode
- Data Modeling for Power BI
- Advanced DAX
- Copilot for Reports
- Semantic Models & Data Hub
- Power BI Deployment in Fabric

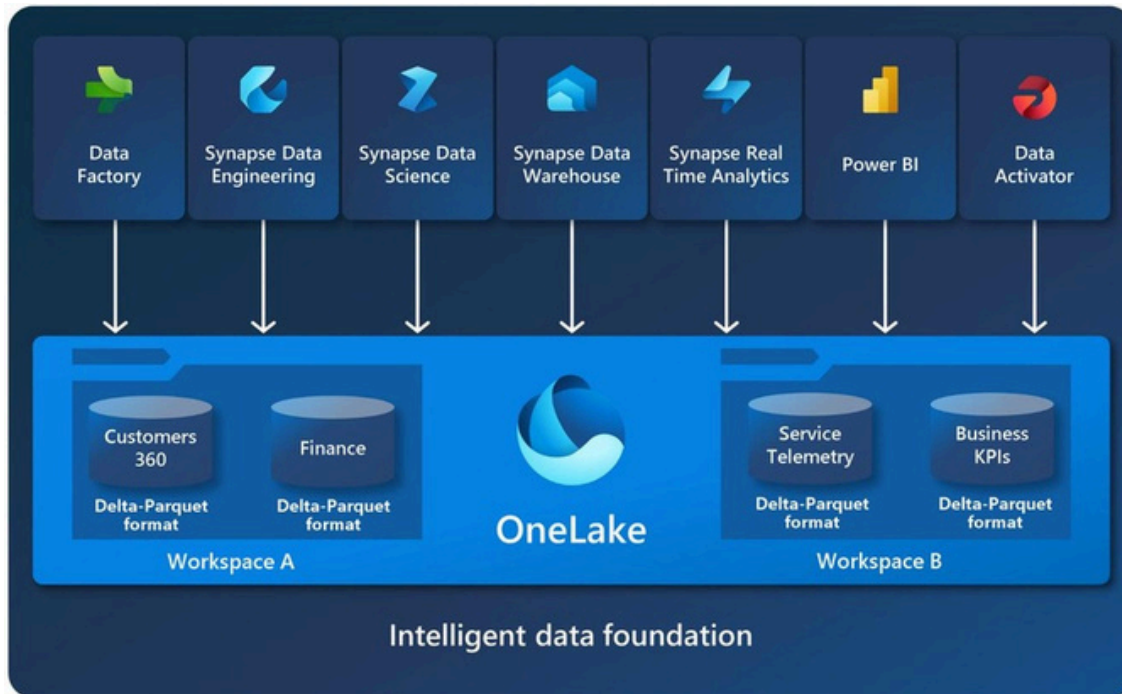

7. Governance, Administration & ALM

- Fabric Admin Portal
- Git & Azure DevOps Integration
- Deployment Pipelines
- Data Lineage & Impact Analysis
- Capacity Monitoring & Optimization
- Tenant-level Security

8. DP-600 Exam Prep & Capstone Project

- DP-600 Domain Review
- End-to-End Fabric Case Studies
- Mock Exam Practice
- SQL & Spark Scenario Reviews
- Unified Analytics Platform Project
- Proctored Exam Tips

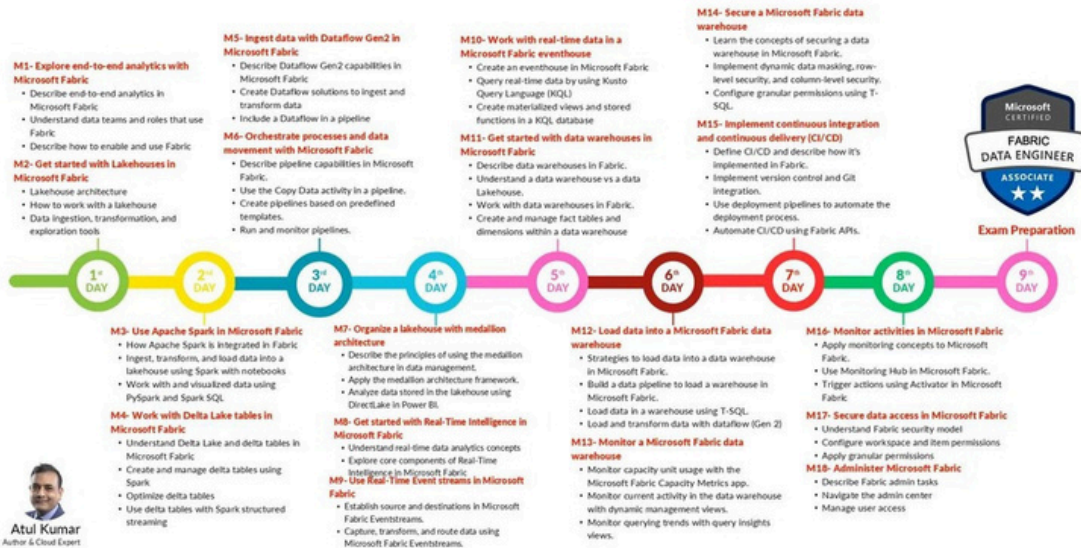

Career Scope

Career Development

Learning Path for Microsoft Certified Fabric Data Engineer [DP-700]

Whom Is It For?

1. Computer Science and IT Graduates
2. SIT professionals seeking expertise in cloud data platforms.
3. Engineering Graduates
4. Business professionals aiming to leverage data insights

Program Outcomes

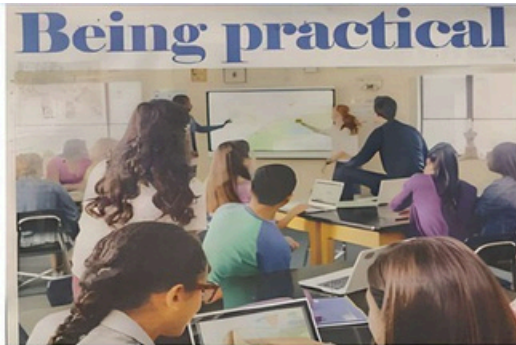

- Build and manage data pipelines using Microsoft Fabric tools
- Perform advanced data transformations and analytics workflows
- Create interactive dashboards using Power BI
- Work with OneLake for unified data storage and governance
- Implement real-time analytics and AI-driven insights
- Manage data security, governance, and collaboration effectively

Qualifications for Eligibility

Basic understanding of data analytics or cloud concepts is helpful but not mandatory..

Media Recognition

Every good organization must have a great accountant. Many businesses today are digital yet the need for skilled accountants to keep track of a business's finances is as important as ever.

Thankfully, by studying online talented people can learn to be great accountants.

30 **Financial Analyst**

If you get excited by the idea of having a 'real' career, if you have a brain who's willing for the numbers, if reading charts, graphs, and other financial information gives you an adrenaline rush, and if you want to work for banks, investment houses, and other agencies, then Financial Analyst is a job for you. It is one of the most exciting careers in the financial world. You will be able to work with the highest, most secure salaries and will also have great career growth in a stable environment.

The first and foremost step in your career as a Financial Analyst is to have a degree in Finance or Accounting and then a postgraduate diploma in Financial Analyst. It is a very competitive course and it is very hard to get into. The first step is to have a degree in Finance or Accounting and then a postgraduate diploma in Financial Analyst. It is a very competitive course and it is very hard to get into.

Internship in Top MNCs

Internship in
Top Global Companies

Get work experience with virtual programs from top global companies such as:

Certificate of experience from top global companies

At your own speed and in your own time, acquire extremely elevating skills.

Make connections between students and prestigious companies by simulating their work.

Obtain a genuine professional edge by working with Fortune 500 companies.

Learn essential skills and get a taste of what actual job looks like. Most notably, some of the world's top pupils
