About Eklabya

EklabyaE-LearningPvt Ltd is a leading global edtech platform offering industry-aligned certification programs designed to elevate your professional journey. With a strong foothold in skill-based education, Eklabya delivers cutting-edge training across fields like IT, management, finance, healthcare, and more—catering to the evolving demands of the modern job market.

OurAWS Certified SysOps Administrator – Associate Training Program is a hands-on, career-focused course designed to help learners master AWS cloud operations, monitoring, and infrastructure management. It prepares learners to deploy, manage, and maintain scalable, fault-tolerant systems while ensuring high availability and performance.

Our Goals

Value generation is our main goal!

“We aim to empower individuals and organizations globally by delivering impactful learning experiences driven by expert content, innovative tools, and advanced technology.”

Why Data Science Certification Training Course?

01. Why is AWS SysOps important in cloud computing?

AWS SysOps focuses on the operational side of cloud computing, ensuring that systems are reliable, scalable, and continuously monitored. It plays a critical role in maintaining system uptime and performance in production environments.

02. How does AWS SysOps help in real-world operations?

It enables professionals to automate infrastructure, monitor applications, and manage cloud resources efficiently, ensuring smooth system operations and quick issue resolution.

03. What makes this course industry-relevant?

The course is aligned with AWS certification standards and includes tools and practices widely used in real-world cloud operations environments.

04. Is this course suitable for beginners?

Yes, while some basic knowledge of cloud or networking is helpful, the course starts with fundamentals and progresses to advanced operational concepts.

05. How does this course improve career opportunities?

AWS SysOps professionals are in high demand due to their ability to manage and maintain cloud systems, making them essential for modern IT infrastructure.

What's the Curriculum?

1. Monitoring, Logging & Remediation

- Amazon CloudWatch Metrics & Dashboards
- CloudWatch Logs & Log Insights
- AWS CloudTrail Auditing
- EventBridge Automated Remediation
- AWS Config Compliance
- AWS Health Dashboard

2. Reliability & Business Continuity

- High Availability with ELB & ASG
- Route 53 Health Checks
- AWS Backup Management
- RDS Multi-AZ & Snapshots
- S3 Versioning & Replication
- Disaster Recovery Strategies

3. Deployment, Provisioning & Automation

- AWS CloudFormation Basics
- StackSets & Drift Detection
- AWS Systems Manager (SSM)
- Parameter Store vs. Secrets Manager
- AWS Elastic Beanstalk
- EC2 Image Builder

4. Security & Compliance Operations

- Advanced IAM & SCPs
- AWS KMS Operations
- Security Groups & NACLs
- AWS WAF & Shield
- Amazon Inspector & Security Hub
- AWS Control Tower & Organizations

5. Networking & Content Delivery

- Advanced VPC Networking
- VPC Flow Logs
- Reachability Analyzer
- AWS VPN Solutions
- Amazon CloudFront
- Route 53 Routing Policies

6. Storage & Data Management

- EBS Volume Management
- S3 Lifecycle Policies
- EFS Performance Modes
- AWS DataSync
- AWS Storage Gateway
- AWS Transfer Family

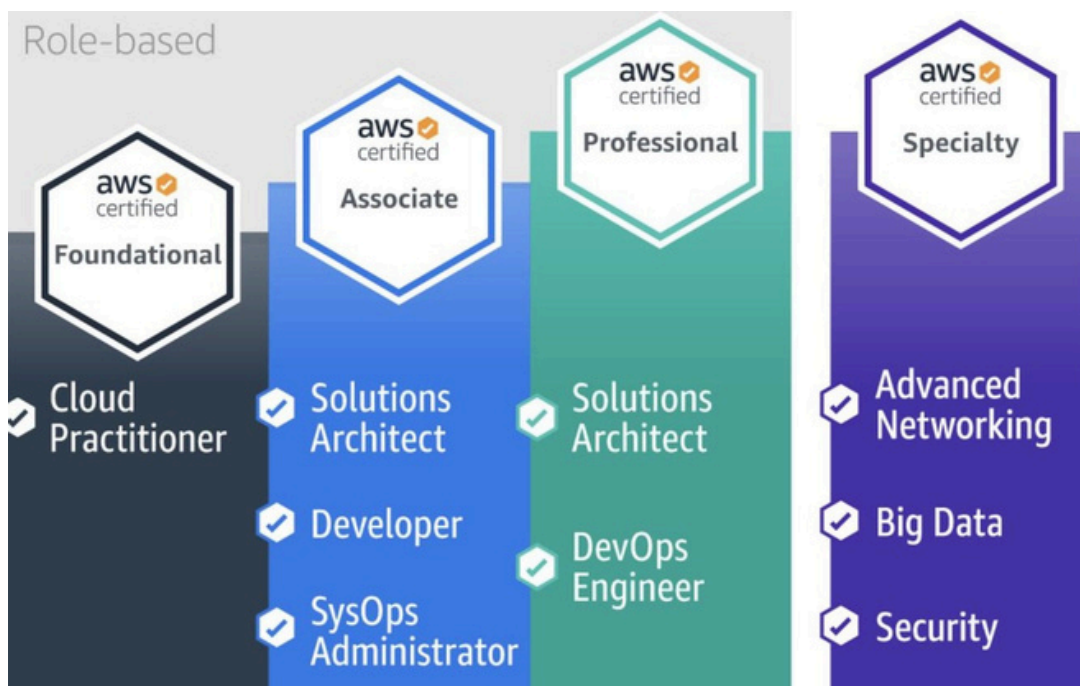

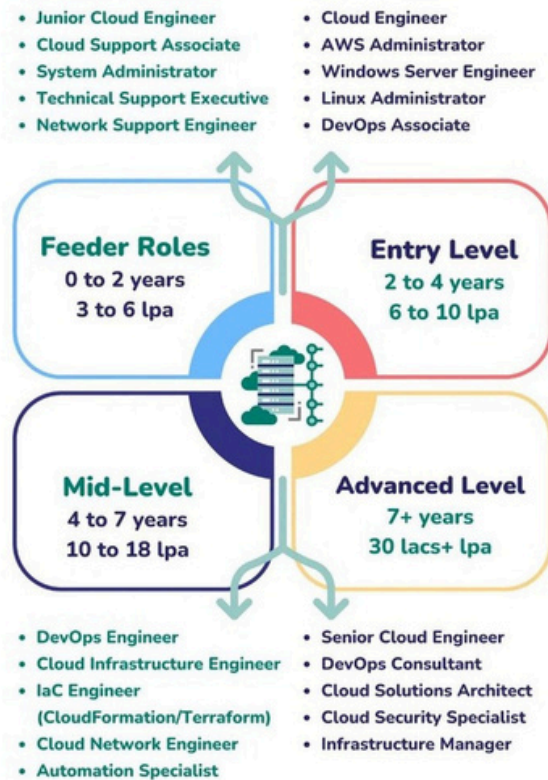

7. Cost & Performance Optimization

- AWS Cost Explorer & Budgets
- Compute Optimizer
- EC2 & EBS Rightsizing
- Savings Plans & Spot Instances
- Database Performance Optimization
- AWS Cost & Usage Reports

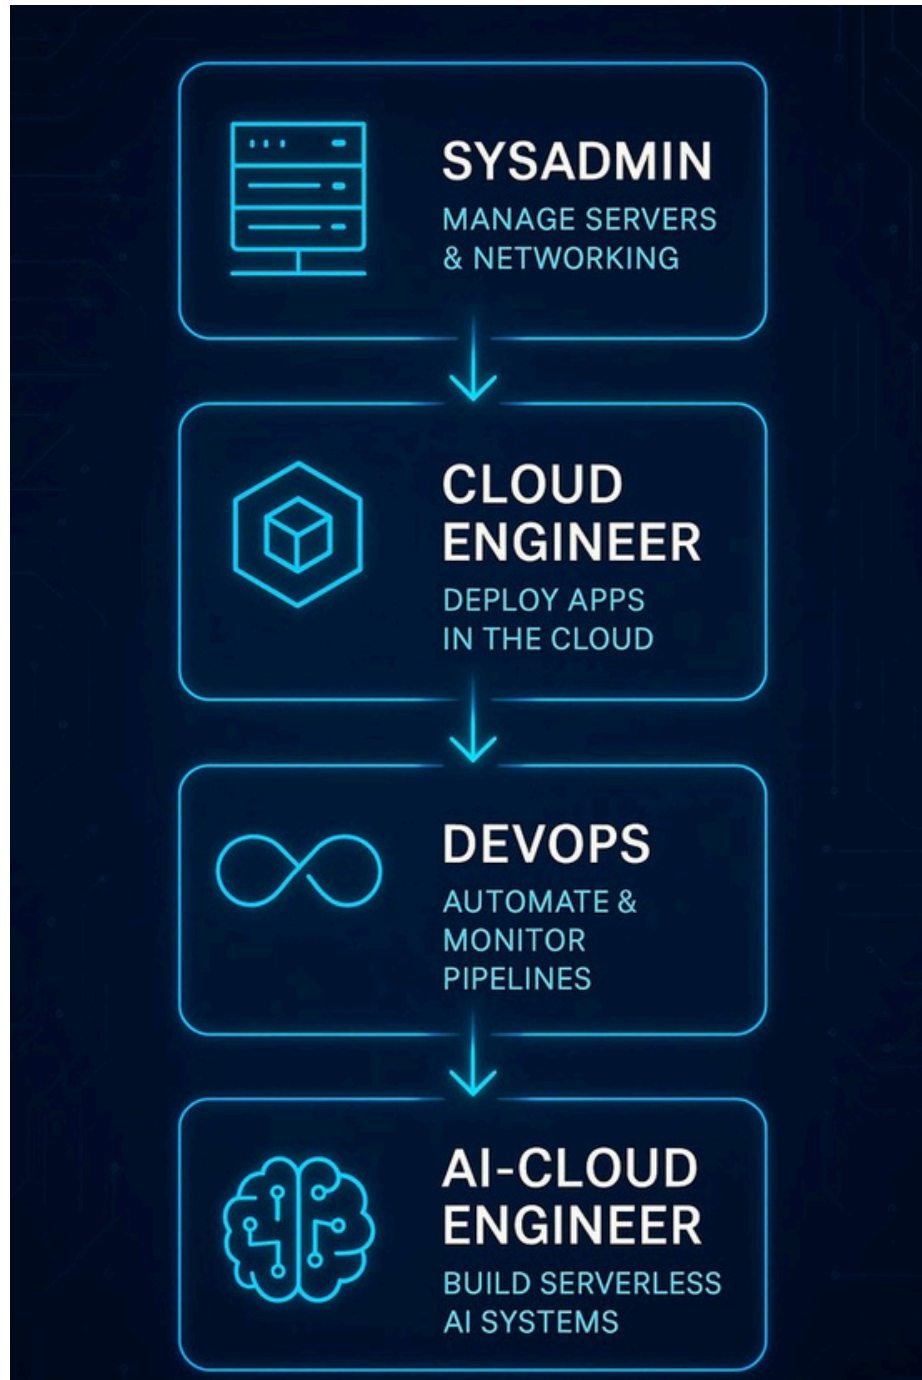

8. Exam Prep & Troubleshooting Labs

- SOA-C02 Exam Strategy
- Troubleshooting Scenarios
- Mock Exam Practice
- Hands-on Lab Reviews
- Proctored Exam Preparation
- Final Revision Tips

Career Scope

Career Development

Whom Is It For?

1. Computer Science and IT Graduates
2. System administrators aiming to transition into cloud roles
3. Engineering Graduates
4. Developers who want to understand infrastructure management

Program Outcomes

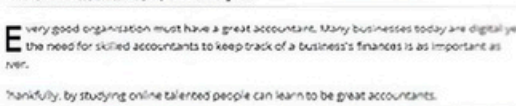

- Deploy and manage scalable AWS cloud systems
- Monitor infrastructure using CloudWatch, CloudTrail, and AWS
- Configure and automate infrastructure using CloudFormation and AWS CLI
- Implement security best practices using IAM and encryption
- Manage backups, disaster recovery, and fault-tolerant systems
- Optimize performance and reduce cloud costs

Qualifications for Eligibility

Basic understanding of AWS services, networking, or system administration is recommended but not mandatory.

Media Recognition

Internship in Top MNCs

Internship in
Top Global Companies

Get work experience with virtual programs from top global companies such as:

Certificate of experience from top global companies

At your own speed and in your own time, acquire extremely elevating skills.

Make connections between students and prestigious companies by simulating their work.

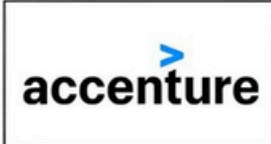

Obtain a genuine professional edge by working with Fortune 500 companies.

Learn essential skills and get a taste of what actual job looks like. Most notably, some of the world's top pupils
